UNWANTED MEDICINE DISPOSAL: DOING IT THE RIGHT WAY, CLEARY UNIVERSITY, JOHNSON CENTER, HOWELL, MICHIGAN. Due to advances in medicine, more people are using medicines for maintaining health and vitality. For many reasons, medicines are not always entirely consumed. Disposing of unwanted medicines is becoming an environmental, public safety and criminal concern with the traditional "flushing" disposal practice no longer deemed acceptable by public health and natural resource experts. Many medicines pass through wastewater treatment facilities and septic systems, ending up in streams, lakes and groundwater throughout the country. In addition, prescription medicines are a major source of poisoning among children and contribute to teen drug abuse. This workshop will provide information and tools for community pharmaceutical collection programs, as well as pharmacies and medical facilities to safely manage unwanted medicines. Presenters will focus on alternatives to "flushing," including best practices from solid waste facilities in Michigan, and surrounding states/provinces. Online registration is available on the Web at www.michigan.gov/deqworkshops, click on "Upcoming DEQ Workshops". Registration Fee: \$75, which includes continental breakfast, lunch, and workshop materials.
